## SUMMARY

AI Software Engineer with full-stack experience building AI-driven applications, automation systems, and cloud-deployed MVPs. Hands-on in integrating 10+ APIs, designing AI agents, and automating workflows used by real clients. Proven ability to work directly with US-based stakeholders, leverage AI-assisted development, and deliver production-ready solutions.

## EDUCATION

VIT AP University

08 2021 – 05 2025

B.Tech CSE AI & ML - **CGPA - 8.67**

Amaravati, AP

## TECHNICAL SKILLS

- **Programming & APIs:** JavaScript (working proficiency), Python, REST APIs, Webhooks, API Integration
- **Frontend:** React.js, HTML, CSS, Tailwind CSS
- **Backend & Automation:** Node.js, n8n, Chatbots, Voice Agents
- **AI Engineering:** Prompt Engineering, AI-assisted Development, Conversational AI
- **Cloud & Deployment:** AWS (EC2, S3), VPS, Netlify, Vercel, Render, Git
- **Soft Skills:** Stakeholder communication, problem-solving, adaptability, ownership, teamwork

## EXPERIENCE

AI Software Engineer - Adonix AI | Full Time

12 2025 - Present

- Worked as a full-stack AI software engineer building 5+ AI-powered applications and automation workflows for business use cases.
- Developed and integrated AI voice agents and chatbots handling 100+ user interactions/day across web and messaging platforms.
- Implemented 10+ REST API integrations and webhooks across AI services, WhatsApp, and automation tools.
- Designed end-to-end automation pipelines processing leads, notifications, and data flows with near real-time execution.
- Collaborated directly with multiple US-based stakeholders and clients, converting requirements into deployable AI features and releases.

AI Software Engineer - AI GPT | Freelance

12 2025 - Present

- Contributed to AI platform development by integrating multiple third-party AI model APIs into a unified system.
- Managed and troubleshoot cloud-hosted VPS environments, restoring services during critical production outages.
- Built and configured secure email subdomains using Postfix and Dovecot to enable reliable platform-to-user communication.
- Performed configuration updates & service restarts to maintain high platform availability & operational stability.

## PROJECTS

Dating Advice AI Platform (MVP) | React, Node.js, VAPI, Gemini API, Prompt Engineering, Netlify, Vercel

- Built a full-stack AI MVP supporting voice + chat interactions, designed for scalable user engagement.
- Integrated a VAPI voice agent trained with structured prompts to generate contextual dating advice responses.
- Deployed production builds on Netlify and Vercel, enabling fast iteration and public accessibility.

AI Automation & Lead Management System | n8n, Meta Developer Platform, Webhooks, LLM's, Google Sheets

- Built chatbots across Facebook, WhatsApp, and web channels capturing 100s of leads automatically.
- Implemented workflows to store leads in Google Sheets and trigger real-time email notifications to vendors.
- Designed scalable n8n automation pipelines reducing manual lead handling and response time.

## ACHIEVEMENTS

- Delivered multiple AI-driven MVPs and automation systems under tight timelines for real clients. Worked directly with US-based stakeholders, translating business needs into deployed AI products.

## CERTIFICATIONS

- AWS Cloud Practitioner 
- Google Cloud Digital Leader
